Cybersecurity professional with SOC experience in security alert investigation, incident response, and security automation. Skilled in Python and PowerShell, with hands-on experience developing OSINT tooling that reduced the IOC investigation time from 5 to 0.16 minutes (96%).

Experience

Deloitte - Security Operations Center Analyst July 2024 - Present

- Developed and deployed a **PowerShell IOC validation tool** integrating VirusTotal and URLScan APIs to consolidate IOC reputation, verdicts, and references into a single console, reducing manual IOC investigation time from 5 to 0.16 minutes (**96%**), saving 250 analyst hours/month.
- Received the **Deloitte Innovator Award** for the OSINT IOC Scanner - (OIS), recognizing its impact on security investigation workflows.
- Automated security operations workflows and investigation tasks, improving analyst efficiency and reducing repetitive manual effort.
- Investigated phishing, malware and endpoint security incidents across incident response life cycle.
- Validated and mitigated security alerts, reducing false positives and improving efficiency.

Irdeto - Automation Intern May 2023 - Aug 2023

- Migrated 50+ **Python** automation scripts to improved framework, saving 4 testing hours/day.
- Refactored Python scripts to improve execution speed, maintainability, and testing efficiency.

Education

B.Tech in Electronics (Major) and Computers (Minor) 2020 - 2024
Shiv Nadar Institute of Eminence Delhi, India

Skills

Programming: Python, PowerShell, Bash, Batch, Java, PHP, SQL
Security: Splunk, Microsoft Defender (for Endpoint, Cloud and Identity), Azure, CrowdStrike, Cofense
Security Concepts: SIEM, IOC Analysis, OSINT, Incident Response, Security Automation, Scripting, Web Development
Systems: Linux, Windows, Raspberry Pi
Languages: English, Hindi, Telugu, French (basic), German (basic), Morse

Projects

Raspberry Pi Projects (IoT) Sep 2023 - Present

- Self-hosted media and lossless music services on Raspberry Pi infrastructure with remote access.
- Configured OpenCanary intrusion detection with automated email alerting and implemented weekly backups for resilience and data recovery.

Cyber Sentinel Feb 2023 - Jan 2024

- Developed an intentionally vulnerable PHP/MySQL based web application covering OWASP Top 10 vulnerabilities for hands-on security testing.
- Documented vulnerability assessment, exploitation, and mitigation techniques with tutorials.

Memory Wipe Aug 2023 - Jan 2024

- Developed a storage wiper in **Bash** and **Python**, for **IoT** devices running **Linux** and **Windows**.
- Implemented auto-wipe based on the target operating system and storage environment.

Certifications & Interests

Certifications:- Blue Team Level 1 (BTL1) by Security Blue Team. (100% score)
Hobbies:- Piano. Automating tasks. CTFs (OSINT, Forensics, Web). Homelab experiments. Typing (85 WPM)
